

Hello Year 5,

I hope you have all had a lovely weekend! It has been such a long time since I have seen you all; I'm really looking forward to our phased return to normality!

It is always good to hear how you are getting on with your maths (good or bad!) so please drop me an email on year5@stokepoges.bucks.sch.uk with any questions or answers or just to say hello!

This week we are working on our new geometry topic (position and direction) looking at reflections and translations of coordinates and shapes. Please follow the links to the online video lessons and also to the in-lesson activity sheets which need to be printed off prior to the lesson (if possible). Each lesson includes sections where you are required to pause the video and carry out activities so you will also need a pencil to work with.

After each lesson you will find worksheets on the website. If you are not able to print these out, then simply record your answers on a plain sheet of paper. Separate answer sheets are provided for all activities.

On **Friday** I have included one revision lesson on Roman Numerals with a choice of fun activities.

Remember, you do not always need to work through *all* of the worksheets and you don't necessarily need to do them in a linear way. Try to take no more than 30 (focussed) minutes on the activities.

In addition to your online lessons, please also don't forget:

- Maths homework continues to be set on a Tuesday and is due for completion by Thursday morning.
- The Schofield and Sims maths practice tests are extension activities - only 1 needs to be completed each week.

Wishing you another happy week of learning!

Mrs Steele ☺
